

Taxation

How to avoid a 600% tax cost rise

Act now and switch to electric vehicles!

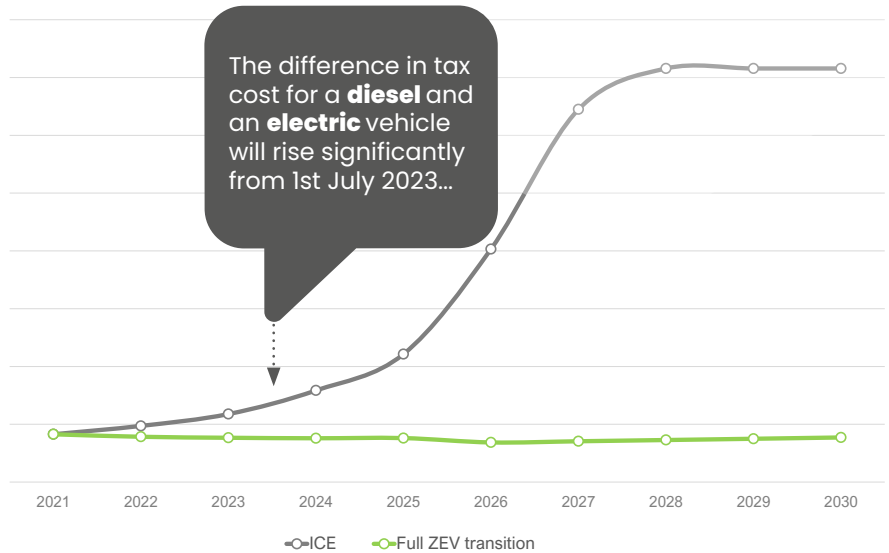

SPECIAL SME OFFER

Your key challenges

You need to understand and control fleet tax cost immediately. Without action, you will see an increase of up to **600%** in the following years for non zero emission vehicles.

The benefit in kind for an electric equivalent vehicle is up to **35-45%** lower for your employees.

Your CSR strategy, your employees and your customers urge you to go **greener fast**.

Your Solution

Understanding the resource limitation of the SME business, Fleet360 is now offering you an SME assistance package for the electrification of your fleet.

Based on years of experience with larger multinationals, designing and executing programmes for the Chamber of Commerce and the Flemish government, we are your solid partner in this inevitable transition.

What we need from You

- 📄 A copy your car policy and, if applicable, your driver code of conduct
- 📄 Your current car fleet data
- 📄 EV quotes from your leasing company or dealer

What we will Deliver

- ✔ An update of your car policy to embrace and integrate electrification into your fleet
- ✔ New budgets for electric vehicles based on a TCO approach and a first impression of the EVs that fit within these budgets
- ✔ An online meeting to launch the project and a second one to discuss the outcome
- ✔ Charging infrastructure best practice for your workplace and drivers

Our typical turnaround time is 4 weeks upon receiving the data.
